

Champions League 2024 skin

Thank you for donating to me and supporting my work! This is the full release version of the Champions League 2024 skin for Football Manager 2024, optimized for HD Resolutions (1920x1080), windowed and full screen, 100% zoom and compatible with game version 24.1. At release my skins are always “perfect as possible”, as a result “regular updates” would not be needed and as a result are very limited, with the exception of “bug fixes” (when needed).

Other resolutions than 1920x1080 are not supported, 2560x1440 with 125% zoom works good, edited panel for this resolution and zoom% is included as an option.

The skin comes standard with a “hidden sidebar”, make sure “sidebar icons only” is selected in the preferences screen for full compatibility.

Please: Respect the many hours I spent on creating and perfecting this skin. DO NOT post the skin on any website or share with others on forums without my written consent.

This skin is exclusively available through www.footballmanagergraphics.com. Check the posting on the forums for updates: [Champions League 2024 skin - Football Manager 2024 Skins - Football Manager Graphics](#)

This skin wouldn't have been possible without the work of:

Gunzo/Maruemon/DogChacha (FMNation/Flayus), _Ben_ (Statman skin), GIMN (Mustermann skin), Wkdsoul, Dasz8, Pikawa (CFM skin), Flut (FIUT skins), EmilDebski (Vitrex skins (2016/2017)), SirWill (Clinched skin 2017), OPZ, Wozzie, TheBantams/Rick Thorne (Andromeda skins).

Recommended for use with this skin (not included):

Facepack of your choice (cut-out version is most compatible), DF11/ASF support in player overview panels, logo and kits packs, Cities megapack (showing city pictures in club screens), Stadium and background packs. The logo pack showing in the screenshots included are from my own "ESSv5" style logo's. Available at [ESS v5 Logo's REVIVED !!! - Other Football Manager Graphics - FM24 - Football Manager 2024 \(sortitoutsi.net\)](https://www.sortitoutsi.net/ess-v5-logo-revived)

If you have installed an earlier (BETA) version: ALWAYS completely remove any previous version of the skin prior to unpacking the full skin release version. DO NOT overwrite an existing version. Make sure to delete ANY *.fmf files in your "skins" folder or in the "Steam Workshop" folder(s) as they may conflict with the proper working of the skin.

This "README" pdf will answer most of your questions, please read this pdf prior to asking questions (mail me on "footballmanagergraphics.com" or through email at a31632@hotmail.com)

The 2024 version of the skin features:

- Edited match intro (with option to bypass the "LICENSED" intro and scoreboards)
- Datahub screens with tabbed container for new look with "Data Hub Widgets" and "Classic Data Hub screens
- Multiple options to customize the skin with scoreboard mods, no attributes mod, with/without hidden sidebar, background support etc.
- Team squad panels refreshed with alternative options
- Added "Squad Depth" menu with all screens in the "Squad Planner" section
- Updated manager, non-player (staff) and player pop up screens, added tabbed containers for easier viewing
- Over 150 panels added and edited, scouting screens, training screens and lots of other screens tweaked, animated and enhanced

*******Please do not redistribute the skin without my explicit permission, either in original form or in a "tweaked" or edited version*******

Installation instructions (Windows):

Extract the 7z file (CHAMPIONS LEAGUE 2024 FULL RELEASE.7z) with 7-zip in: "**..../users/(your name)/My Documents/Sports Interactive/Football Manager 2024/skin**". Make sure to use the official 7-zip for extraction as errors like "password incorrect" when using "WinRAR/WinZip or other extraction software may occur as a result.

ALWAYS install the skin first and where needed use the MOD files to overwrite the existing skin files

Option to change the tactic screen to a "tabbed container" (mod folder "TACTICS TABBED")

Regular tactics screen:

Tabbed container version:

This is a beta version

Scoreboard options: (screenshots show older Football Manager versions but work and look identical in the 2024 version)

The panels for the alternative scoreboards are in the file: "CHAMPIONS LEAGUE 2024 SCOREBOARDS.7z"

Overwrite the files, when prompted, to switch between "standard (small)"/"retro-BIG" and "scoreboard selector". There is also a file included that can be used in the skin to get the FM23 "matchday mods" release showing properly in my skin. The graphics for all these scoreboards (with exception of the "scoreboard selector" graphics and "Matchday Mod" graphics) are all included in my skin.

The "Matchday mod" can be downloaded here (not included in my skin as it is not allowed by the creator): [\[FM23\] Matchday Mods | Sky Sports PL 25/03/2023 | La Liga, Ligue 1 and Liga Bwin UPDATED - Skinning Hideout - Sports Interactive Community \(sigames.com\)](#)

Overwrite the existing "match titlebar" file with the one added in my skin download to ensure the match screen looks good in the Champions League 2024 skin.

In FM 23 and FM24 the game generates "LICENSED" scoreboards for a few competitions, including UEFA. I have edited the scoreboards and match captions to ONE format, so they look identical in every match (I prefer to use the regular screens instead of the licensed ones). If you prefer to see the licensed scoreboards and match captions when playing in a licensed competition do the following:

Navigate to "panels/match/comps" there you will see a lot of folders and subfolders and some files have the extension: ".LICENSED" (these are the original files used by the game), depending on what you want to change (only scoreboard, only match caption or all) rename ".LICENSED" file to ".xml" files and remove/delete the ones with the same name made by me.

If you reload the skin after this it will override scoreboards again for certain competitions and only show the static scoreboard if no licensed scoreboards are triggered.

Additional notes:

Scoreboard selector/floating (small) scoreboard in match screens: (newly added as a separate download)

The “**scoreboard selector**” files were made by “Jovovich/Maruemon” and he has **not allowed** the use of these scoreboards in “paid”/donation versions. I will be able to help you implement these scoreboards in the skin and have them work properly. I also edited the look of the screen so it has an overall better look. Please make sure you follow **all** the instructions below to get it to work:

Step 1:

Download the “scoreboard selector files” from here:

[Scoreboard selector for fm2019 - Skinning Hideout - Sports](#)

[Interactive Community \(sigames.com\)](#)

Step 2:

Please read carefully:

Unpack/extract the files from the “Champions League 2024 SCOREBOARDS.7z” file which includes all 3 versions of the scoreboards that also contains the “scoreboard selector adjustments in a **SEPARATE location** (NOT as last year and as usual in the main folder of the skin), copy **ONLY** the “**graphics**” folder, “**fonts**” folder and the “**panels/scoreboard_selector folders/files**” into the skin.

Do not copy any other files or panels (generic/header, match/match titlebar or global panels) **into the skin**. As coding has changed significantly since FM2019/FM 2020 this will create major issues with match/title bars and it will not look as in the screenshots shown here.

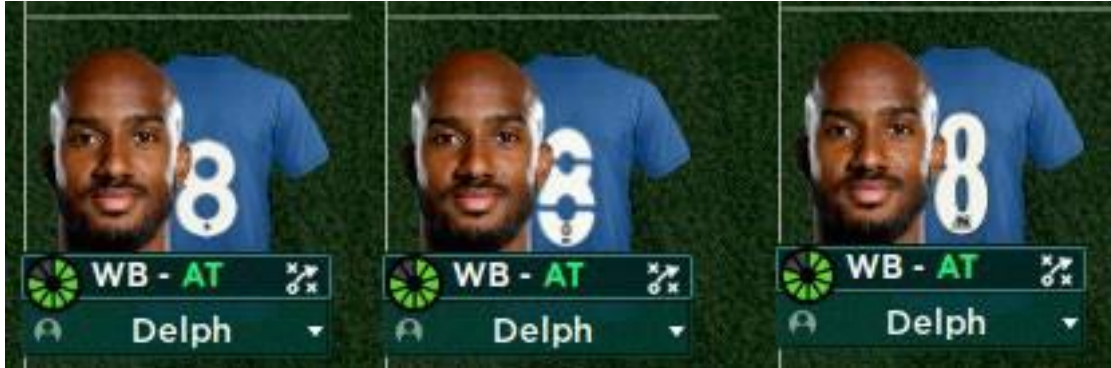

Step 3:

In my separate download you will find an adjusted “match titlebar” panel which needs to be copied into the “panels/match” folder (overwrite the existing file), this one file has all the code in it to get the scoreboards to work perfectly in the skin. Included is also “match title bar score epl.xml” (copy into “scoreboard_selector” folder in panels and overwrite the downloaded version) this new file has an edited clock graphic in it (standard isn’t working given changes in FM2024 with colors). **Empty cache and reload skin** and the scoreboard should work fine.

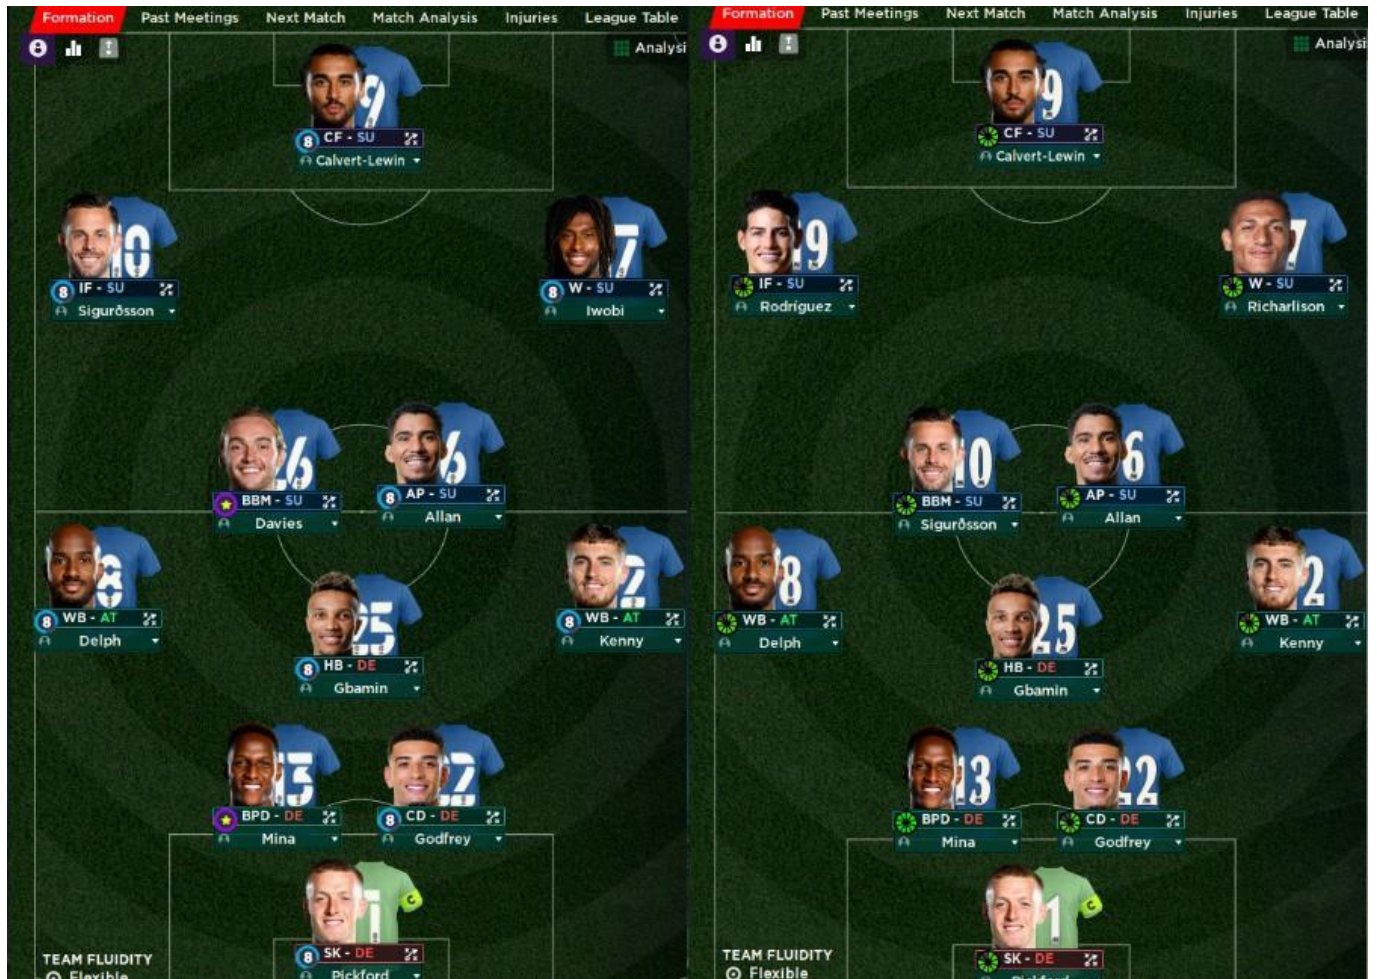

New kit numbers as alternative available:

Replace kits in “pictures/kits/2d/numbers” there are extra folders: “numbers EFL”, “numbers EPL” and “numbers EPL OLD” (currently the default numbers)

(EPL 2020-2021, EFL 2020-2021, EPL OLD compared)

Also shown optional replacement of “PIE Chart” graphics with numbered graphics. These alternative graphics are located in “icons/custom/role rating”, in the “circular alt” folder. Replace the files in the “circular” folder and reload the skin to show the alternative graphics.

Autohide/non autohide sidebar:

In the standard version the sidebar will autohide. For the sidebar NOT to autohide: navigate to: "panels/client_object" folder in the skin and delete (or rename) "client object browser.xml" and replace with "client object browser.xml NO AUTO HIDE". When done, delete the "NO AUTO HIDE" portion and reload the skin for the changes to take effect.

Using background pics in the skin (instead of a solid background picture):

For background pictures to show properly the same "client_object" folder will need to be accessed. In this case replace the "client object browser.xml" file (standard with "autohide" and "no backgrounds") with the file of your choice (either AUTOHIDE WITH BACKGROUNDS or NO AUTOHIDE WITH BACKGROUNDS).

"Blurring effect":

If you would like to remove the "blurring effect" from the skin; navigate to "graphics/boxes/dialog/background/paper.xml" and edit this file. Change "<boolean id="blurred" value="true"/>", replace "true" with "false". This will disable the blurring effect.

Background logo in the middle of the screen (with static backgrounds only):

To remove the background logo in the middle of the screen, navigate to "panels/client_object/client object browser.xml" and delete the lines 24-29 containing:

```
<!-- Logo -->

<widget class="picture" id="mnpV" image_alignment="centre" scale_picture="false"
transparency="0.4">

<record id="object_property">

<integer id="get_property" value="mnpc" />

</record>

</widget>
```

As always, reload the skin (make sure "caching" is not ticked and the logo is now gone.

Change default newspaper in the “news” section:

In the newspaper section in “news” the selected tab will show the newspaper/website header selected. It is default set to “Sky Sports”. If you want it to default to another newspaper, navigate to “panels/competition/competition news panel.xml”. Look at line 119: <container class="tabbed_container" id="gcol" **default_item="skys"** save_session_state="true" dont_set_embedded_title="true" >

Below this line of code you will see all the other newspapers listed that are available, so if you for example would like to change the default to “Eurosport”, change “skys” in line 119 to “euro”, when you reload the skin it will show the new default newspaper.

Opacity default setting (default opacity setting at 10%)

To change this. Navigate to “panels/background_selector/backgrounds.xml”, look at line 167-207:

```
<!-- overlay sections -->

<!-- 10% -->

<container class="plain_box" id="10bg" appearance="boxes/overlay/10/10" >

    <layout class="stick_to_sides_attachment" alignment="all" inset="0"/>

</container>

<!-- 20% -->

<container class="plain_box" id="20bg" appearance="boxes/overlay/20/20" hidn="true">

    <layout class="stick_to_sides_attachment" alignment="all" inset="0"/>

</container>

<!-- 30% -->

<container class="plain_box" id="30bg" appearance="boxes/overlay/30/30" hidn="true">

    <layout class="stick_to_sides_attachment" alignment="all" inset="0"/>

</container>

<!-- 40% -->

<container class="plain_box" id="40bg" appearance="boxes/overlay/40/40" hidn="true">

    <layout class="stick_to_sides_attachment" alignment="all" inset="0"/>
```

```
</container>

<!-- 50% -->

<container class="plain_box" id="50bg" appearance="boxes/overlay/50/50" hidn="true">

  <layout class="stick_to_sides_attachment" alignment="all" inset="0"/>

</container>

<!-- 60% -->

<container class="plain_box" id="60bg" appearance="boxes/overlay/60/60" hidn="true">

  <layout class="stick_to_sides_attachment" alignment="all" inset="0"/>

</container>

<!-- 70% -->

<container class="plain_box" id="70bg" appearance="boxes/overlay/70/70" hidn="true">

  <layout class="stick_to_sides_attachment" alignment="all" inset="0"/>

</container>

<!-- 80%-->

<container class="plain_box" id="80bg" appearance="boxes/overlay/80/80" hidn="true">

  <layout class="stick_to_sides_attachment" alignment="all" inset="0"/>

</container>
```

hidn="true" means that it is NOT the default setting (10% is showing "hidn="true"), change this around and select which opacity level you would like to use and change hidn="false" to "true" for that value (while setting the 10% setting to hidn="false")

Known issues:

- a) The “logo selector” (in 3D matches) and “background selector” are using similar coding. As a result, if you want to use “solid backgrounds” and use the “background selector” you will notice **only a few backgrounds will “work”** and get activated. In order for the “background selector” to work properly follow these instructions:
Select the logo in your match you would like to use with the logo selector. After this navigate to the “panels/logo_selector” folder and rename this folder to something different example “logo_selector.old“. After this reload the skin, the “logo selector” will now still show the logo you selected in the game but because you changed the folder name clicking on the TV icon will not change anything anymore. The background selector will now work as intended for ALL BACKGROUNDS. (for reverting back obviously do thereverse and rename the folder name back)
- b) As in the 2022/2021 version the numbers/% in all screens have been recoded to show the “old” condition and match sharpness statistics instead of the (new) icons. I was able to also get these into the “match in between highlights” and “match mid match” and “match full match” review panels.
As this code isn’t supposed to be there, the pop-up window when you hover over it doesn’t work (see screenshots below). The reason is that even in FM19 and FM20 the full stats weren’t even showing, only the condition%. My coding changed this, so this is not a bug.

Thank you again for supporting my work and donating, enjoy the skin!!! If you have any questions, please reach out on the forum at www.footballmanagergraphics.com or email me at a31632@hotmail.com

FW: First Division: Six of the best for A. Madrid

I've attached today's match report from The Madrid Football Informer:

First Division: Six of the best for A. Madrid

(Priest Officer) Iris Nieto

Attendance: 68,406

6-0

A. MADRID R. MADRID

In what had been billed as a close encounter, R. Madrid were trounced 6-0 by A. Madrid at Metropolitano de Madrid. A brace from Thomas Lemar helped A. Madrid to victory.

Fleamoyant striker João Félix got A. Madrid off to a flyer by scoring a powerful close range effort on 2 minutes. Central African Rep. captain Geoffrey Kondogbia doubled A. Madrid's lead with a close range header on 12 minutes.

Koke scored with a powerful close range volley into the top corner in the 35th minute to extend the lead further. Complete Wing-Back Nahuel Molina then added to the lead with a well timed close range finish on 42 minutes.

R. Madrid's Canjajal was forced off with a fractured lower arm in the 62nd minute following a tackle by Koke. Things went from bad to worse for R. Madrid as Federico Valverde, playing as a right winger, earned himself an early bath for a bad tackle on 79 minutes.

Lemar then increased A. Madrid's advantage further with a thumping free kick from 24 metres on 80 minutes. R. Madrid's Benzema was forced off with a tight hamstring in the 85th minute whilst attempting to sprint.

Lemar completed the rout on 87 minutes with a low drive which took a deflection.

A. Madrid have climbed above Valencia and A. Bilbao to 3rd in the Spanish First Division.

TRAINING RATING: 6.95

Stefan Savić has performed okay in training lately and has been putting in a very good effort.

Technical Attributes

- Technical: 6, 8, 8, 8, 11, 5, 14, 8, 9, 12, 8, 16, 12, 8, 14, 11
- Mental: 6, 8, 8, 14, 11, 5, 14, 8, 9, 12, 8, 16, 12, 8, 14, 11
- Physical: 14, 17, 14, 14, 15, 10, 15, 15, 14, 14, 7, 15, 15, 11, 16

Tactical Familiarity: DCR/BPD/D, ATLETICO MADRID...

Training Position: D (C)

Training Unit: Defensive

Position/Role/Duty: D (C) - Playing position

Additional Focus: None

Intensity Level: Normal Intensity

Weaker Foot Training: Start Developing Weaker Foot

Individual Training Workload: Medium

Training Report: N. Vivas (Assistant Manager)

- Has shown early signs that he may be on the decline as a footballer over the last three months.
- Has performed okay in training lately and has been putting in a very good effort.

Medical Report: Overall Physical Condition... Overall Risk of Injury: Normal

Match Sharpness: Cristiano Eitate feels the current training workload for Stefan Savić is unlikely to lead to an above average level of injuries.

Overall: ASSISTANT MANAGER FEEDBACK

Martin Terrier

25 year-old winger

Contracted to Rennes €260K per month until 30/6/2026

Martin Terrier is a player I recommend that matches a recent recruitment focus.

Estimated Wage: €262K p/m - €328K p/m | Earns €260K p/m

Estimated Cost: €24M - €34.5M

Transfer Interest: Interested | Loan Interest: Unknown

Recommendation: B Would be a good signing.
